

Array mounting system

Widely range of application

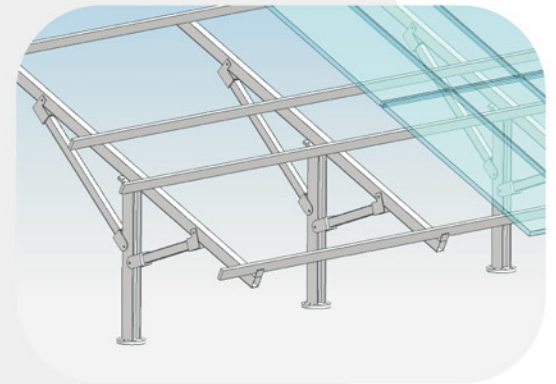

The single pole array system fits various geology environment, includes the ground with gravel.

Cost efficiency of installation

For the simple structure of itself, it is easy to install, and because with the single pole, it will save a lot of time to fix the base of the system.

Reliable

The structure is a reversed triangle, which makes the pressure concentrate on the pole, then improve the wind load of the hole system.

Parameters

Application	Grounding system
Geology environment	Any, even with gravel
Material of structure	Stainless steel and anodised aluminium
Module Type	With or without frame
Wind load	42m/s
Snow load	1.1kg/m ²
Warranty	10years

Key components

Pole

Support the whole system

Cross brace

Fasten the structure

Sqaure tube

Install the rail

Rail

Install the module

Block

Fix the rail
