

The flat rooftop mounting system

Wide Application scope

This flat rooftop mounting system fits the residential and the commercial buildings , also usually used as grounding mounts.

High efficiency

With the scientific design of the structure, it eliminates the shadow of the parapet, and it has a good performance of cooling, which increase the eletrical output of the system.

Reliable Structure

The mounts structure warranty is 10 years , and the wind resist is 55m/s.

Parameters

Application	Flat rooftop
Type of building	Resident . comencial and other public buildings
Material of structure	Stainless steel and anodised aluminium
Tilt angle	Adjustable
Module Type	With or without frame
Wind load	55m/s
Snow load	1.4kg/m ²
Warranty	10years

Key components

Support beam

fixed to the rail and support the modules

Cross beam

fix the structure

Rail

install the module
